<b>Backward design,</b>  The Big Idea	<p>Wiggins and McTighe ask instructors to consider not only the course goals and objectives, but the learning that should endure over the long term. This is referred to as the “enduring understanding.” Wiggins and McTighe suggest that “the enduring understanding” is not just “material worth covering," but includes the following elements:</p> <ul style="list-style-type: none"> <li>• Enduring value beyond the classroom</li> <li>• Resides at the heart of the discipline</li> <li>• Required un-coverage of abstract or often misunderstood ideas</li> <li>• Offer potential for engaging students</li> </ul> <p>“Backward design” uses a question format rather than measurable objectives. By answering key questions, students deepen their learning about content and experience an enduring understanding. The instructor sets the evidence that will be used to determine that the students have understood the content.</p> <p>These questions focus on the following:</p> <ul style="list-style-type: none"> <li>• To what extent does the idea, topic, or process reside at the heart of the discipline?</li> <li>• What questions point toward the big ideas and understandings?</li> <li>• What arguable questions deepen inquiry and discussion?</li> <li>• What questions provide a broader intellectual focus, hence purpose, to the work?</li> </ul>					
<table border="1"> <tr> <td><b>Habits of Mind</b></td> </tr> <tr> <td>Team work</td> </tr> <tr> <td>Culture</td> </tr> <tr> <td>presentations</td> </tr> </table>	<b>Habits of Mind</b>	Team work	Culture	presentations	<p>What habits of mind do we want students to develop and employ? What will we do to assist their development? How might we work collaboratively to determine if students are developing such disposition over time? What will we see or hear in students' behavior as evidence of their growth? How might we practice and assess our own growth toward these habits of mind through</p>
